Emergency Services

Mr John Oliver
General Secretary
United Firefighters Union of Queensland
Ground Floor
286 Montague Road
WEST END QLD 4101

Dear Mr Oliver

Thank you for your correspondence received via email on 26 November 2018, regarding United Firefighters Union Queensland (UFUQ) support to implement the telematics solution.

As discussed by UFUQ Industrial Officer Mr Anthony Cooke at the Fleet Telematics Proof of Concept (POC) Steering Committee meeting held Tuesday 20 November 2018, UFUQ have some concerns that the data being captured as part of this pilot, may be used to monitor and performance manage UFUQ members.

Queensland Fire and Emergency Services (QFES), Fire and Rescue (F&R) are providing assurance that the data being captured will only be used for the following reasons:

- Realtime location tracking of vehicles to assist in emergency situations, and to provide for enhanced knowledge of vehicle locations when calling for more support at emergency situations, and
- Realtime monitoring of vehicle performance to enhance capacity for predictive fleet maintenance.

In addition, QFES, F&R guarantees that the forms of data captured as outlined in page 4 (Your Requirements) of the 'Public Safety Business Agency Trial/Proof of Concept Pricing – Commercial in Confidence' document (**Attachment A**), will never be used as evidence in any performance management, any other form of discipline or other punitive management processes.

Upon receipt of the written undertaking, we look forward to working with the UFUQ as part of the Steering Committee to develop a UFUQ 'Code 2' publication, outlining the process, listing the benefits and providing assurance that the process will not be used against your members.
