## **Medical and Fitness Test Pilot**

The United Firefighters Union has been informed that a number of tests including glucose and cholesterol checks have been performed and are scheduled to be done in the near future on Queensland Firefighters. UFUQ have a number of concerns regarding this testing and what data is being collected.

All UFUQ members are to cease any participation in QFRS Wellness medical testing or physical fitness testing until further notice.

This includes the student pilot project and the QFRS Wellness road show project.
